The firm of A. G. Odell, Jr. and Associates is composed of skilled architects and engineers who combine their diversified talents to provide thorough and complete professional services in the creation of buildings and their environmental facilities.

Headed by A. G. Odell, Jr., whose experience and ability have attracted top architects and engineers to the organization, it includes specialists in all types of building design, experts in mechanical, electrical, civil, and structural engineering, regional and city planners, landscape designers, and interior planners. Working together, they form a highly creative and at the same time soundly practical team, proficient in all aspects of building design and construction supervision and with responsible control throughout the analysis, programming, planning, development, and completion of a project.

On the staff of more than 50 members are architects and engineers with degrees from the nation's leading universities and professional institutions. Memberships are held in the American Institute of Architects, the National Society of Professional Engineers, the American Society of Mechanical Engineers, the American Society of Electrical Engineers, the American Society of Heating, Refrigeration, and Air Conditioning Engineers, the American Water Works Association, the American Society of Civil Engineers, and the American Institute of Planners.

The basic principle of the firm is to produce on schedule superior designs which can be built within prescribed budgets. The creation of structures and facilities of maximum efficiency, economical cost, and distinctive beauty is the result of this policy.

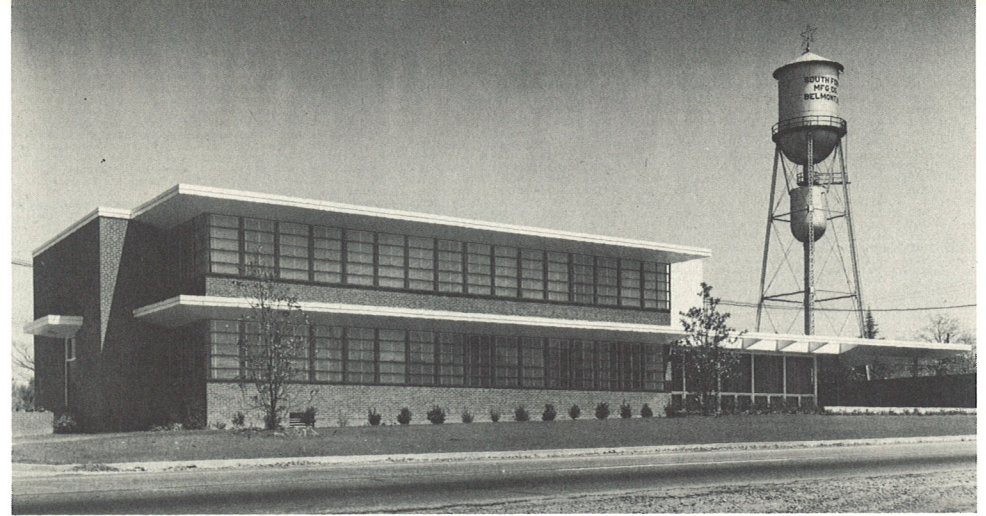

A. G. Odell, Jr. and Associates was established in 1939. Uniting experience, knowledge, and professional skill, it renders an effective service to the rapidly expanding economy of the Southeast.

"... Our achievements in aesthetics are obtained through the creation of efficient and economical buildings as developed by the teamwork of the talented and skilled professionals of our staff.

"Regardless of how many design awards we may win, our primary consideration always must be to create a design within the predetermined budget, and to do this so expertly that each project we agree to undertake — whether large or small — fulfills its operational requirements completely, has artistic merit, and, above all, is a sound investment for our client."

Arthur Gould Odell, Jr., FAIA*

* From remarks made to the staff in 1957 after being named a Fellow of the American Institute of Architects "for his notable contribution to the advancement of the profession of architecture by his achievements in Design."
